

We have renewed our energy rating certificates and all windows now come with the new type energy rating labels. The EcoA window comes with a simplified energy rating certificate; this means that the overall U-value, the solar gain and the air leakage figures are not detailed.

## Eurosash EcoA rated (double glazed)

- ✓ Simplified energy rating certificate supplied
- ✓ 24mm double glazed, 1 Low-E pane with float glass externally
- ✓ Black warm edge spacer bar with argon gas filled cavity
- ✓ Centre pane U-Value 1.1W/(m2.K)
- ✓ Overall window U-Value of 1.5W/(m2.K)
- ✓ Mixed reinforcing, both thermal inserts and steel used
- ✓ Low air leakage with our unique **eurosash** sealing system
- ✓ Available with all Georgian & astragal bar options
- ✓ Deep bottom rail effect is possible with this simplified certificate

Eurosash EcoA is also available with triple glazing using argon gas to keep the cost down; it carries the same simplified certificate as EcoA double glazed.

## Eurosash EcoA rated (triple glazed)

- ✓ Simplified energy rating certificate supplied
- ✓ 28mm triple glazed, 2xLow-E panes with float externally
- ✓ Twin black 8mm warm edge spacer bars, with argon gas fill
- ✓ Centre pane U-Value 1.1W/(m2.K)
- ✓ Overall window U-Value of 1.3W/(m2.K)
- ✓ Mixed reinforcing, both thermal inserts and steel used
- ✓ Low air leakage with our unique **eurosash** sealing system
- ✓ Available clear (no astragals) and with single vertical astragal only
- ✓ Deep bottom rail effect is possible with this simplified certificate

Eurosash EcoA will also be available triple glazed (**\*uncertified\***) with a single internal Georgian bar and an internal Georgian bar grid. To do this we change the make-up from twin black 8mm warm edge spacers to 1no 6mm black aluminium & 1no 10mm black warm spacer bar, with the internal Georgian in the 10mm cavity. We cannot certify a window with this specification.
